

High Speed Mini Centrifuge

MC15K

Description:

The High-speed Mini-centrifuge is a compact centrifuge capable of achieving centrifugal speeds up to 15000rpm, that is approximately 15080g. It is used for extracting RNA/DNA samples, sedimentation of biological components, biochemical and chemical analysis of micro samples. Automatic imbalance switch-off and locking of lid provide safe operation. The rotor accepts 1.5 to 2.0ml tubes directly, as well as 0.5ml and 0.2ml tubes with optional adapters.

Features:

- ▶ LCD provides a clear indication of time and rpm or RCF.
- ▶ RPM/RCF setting as required.
- ▶ The rotor is made of nylon material, with corrosion resistance, minimizes the temperature increases during longer
- ▶ Accelerates and decelerates in just 14seconds.
- ▶ Safety operation: rotor imbalance diagnostic; automatic stop.
- ▶ Motor overheating protection function.
- ▶ A separate momentary short button permits instant spin downs.
- ▶ Low sample heating (only 5°C after 30min, at max. speed).
- ▶ A brushless motor provides noiseless performance and long service life.

Technical Specifications:

Model	MC15K
Capacity	12x1.5/2.0ml centrifuge tubes
Speed range	500~15000rpm
RCF range	16~15080g
Timing range	15sec~99min59sec/∞
Acceleration	14sec(0~15000rpm)
Deceleration	14sec(15000~1000rpm)
Rotor imbalance diagnostic	Yes
Motor overheating protection function	Yes
Power	120W
Voltage	DC24V/5A
Dimension(mm)	255x194x140mm
Weight	2.3kg
